

MOON MENU

Hello beautiful person Welcome!
Our **"Moon Menu 2.0"** is a 3D-menu inspired by the moon and the effects it has on all of us. Tarot readers were once inspired by the moon and the eight different lunar phases. We too were inspired by the moon and the stories it tells.

We invite you on our journey while we explain the story behind every drink to you.

We are so happy that you are here.

Your Elisabethburg Team

24.-

ROCKET

The ROCKET is a sparkling sweet and sour cocktail with a gin liquor base and a "rucola" (rocket) garnish. Yes, we are talking about the plant! This powerful combination of flavours is reminiscent of the Apollo11 space journey to the moon. A sip of our rocket based drink from a 'rocket' will make you feel like getting ready for launch in 3... 2... 1!

20.-

— CARRETTA CARRETTA —

The CARETTA CARETTA is a cocktail that we created to honor the myth of the Caretta turtles. After carefully laying her eggs on the sandy shores of a tropical island, the turtle is now ready to indulge in a well-deserved treat with a banana based drink, hazelnut milk, rum and a touch of vanilla. Knowing after completing an important task like a pregnancy, you're now ready to let loose and get some ba-na-naaa, Go Caretta Caretta!

22.-

JAPANESE SEA

We have captured the JAPANESE SEA and serve its sparkling waters to you in a glass! A glittery, salty and savory drink with a touch of pink ginger and soya sauce. This drink is inspired by the gravitational pull of the moon.

It influences the waves, our seas and ourselves. Shine a light in your "seashell" and watch as something enchanting happens.

The moon will reflect on the surface of your glass.

17.-

— ELISA'S RED MOON —

ELISA'S RED MOON is an alcohol-free beetroot based Negroni, which was inspired by one of the most beautiful versions the moon can take. The red moon event, when the sun fully illuminates the surface of the moon, is represented in the deep red glow in your glass.

We chose beetroot for its mineral taste.
What is the moon if not an enormous mineral stone?
